The New Interpreters' Dictionary of the Bible
 Provides the best quality in contemporary biblical scholarship on a comprehensive range of topics from the Old and New Testaments, the Deuterocanonical books, and from contextual studies of the ancient Near East and the Greco-Roman worlds and their literatures. The dictionary contains maps, charts, and illustrations to further clarify the written material. The biblical text used is the NRSV translation.

A diverse group of 900 scholars from 40 countries have contributed 7100 fresh new articles with 8400 entries including persons, places, things and theological concepts. These contributors were selected by the editorial board for their expertise in their field and for the quality of their scholarship in publication. Special care was taken to select authors who could provide a variety of perspectives from different theological traditions (Protestant, Catholic, Jewish), diverse theological trajectory (conservative and liberal), and from the social locations of gender, ethnicity and race.

Topics are listed in alphabetical order from A-Z and evenly divided among the five volumes. The main entry includes a pronunciation guide. Hebrew and Greek origins of the entry follow, with transliteration. Longer articles contain an introduction that summarises the topic and include a helpful outline to guide the reader. Articles conclude with a short bibliography and cross references to related articles.
